

Speaker Profile

Dr. D. Belcastro

Dr. D Belcastro completed his undergraduate degree in Biochemistry in 1982 and his DDS degree in 1986 from the University of Toronto. He is an alumni of the Pankey Institute (Key Biscayne Fla.); Seattle Institute (with Dr.Frank Spear) and the Misch Institute (advanced oral implantology). He has studied occlusal concepts with Dr.Pete Dawson and Dr.Mark Piper as well as with Dr.John Kois.

Dr. Belcastro is a member in good standing with the American Academy of Periodontology, the International Congress of Oral Implantology, the Canadian Dental Association and many other organizations.

Presently, Dr. Belcastro is completing his Masters of Science in Lille France (Department of Oral and Maxillo-Facial Implantology). He maintains a practice in Esthetics and Rehabilitative Dentistry including Implant Dentistry in Toronto

Exclusive Sponsor

This seminar is being brought to you by:

PRO^{STHETIC}-ART
DENTAL LABORATORY LIMITED
INSTITUTE OF DENTAL TECHNOLOGY™
Where Art & Science Meet™

Pro-Art's Implant Department is well equipped with the latest technology; a sophisticated milling machine, advanced laser welder and a full titanium system. Knowledge, experience and support of highly skilled technicians are here working for you.

Cases are planned in detail, from pre-prosthetic, radiographic stents, surgi guides to the final prosthetics for each case. Sophisticated results and pleasing aesthetics, restoring milled bars, overdentures, fixed/detachable, or implant crown and bridge. We are proud to serve you.

Esthetic Excellence in Implant Dentistry

Seminar Description

Esthetic Excellence in Implant Dentistry

- Is there a standard for esthetic excellence in implant dentistry today?
- Is it realistic to expect the same standard of esthetic excellence with implant restorations that we have come to expect of our restorations on natural teeth?
- If not, what are the compromises?
- How much of a compromise is acceptable?
- What variables need to be managed when you treatment plan for esthetic implant restorations?
- Does the presence of natural teeth influence how we treatment plan our final restorations?
- Should it?
- What are the limitations to esthetic excellence when multiple adjacent implant restorations are contemplated?
- Is it ever acceptable to use pink porcelain or acrylic to compensate for lack of papilla/soft tissue?
- How does lip line influence this decision?

Objectives

The seminar is designed to help the participants understand which factors will influence the final implant restoration.

Mastering these concepts will give us the confidence that the final restoration will surpass our patients expectations.
